ANNALS OF HUMAN BIOLOGY, 1991, VOL. 18, NO. 6, 557–558

SUBJECT INDEX

ABO and Rh(D) frequencies in the Ards Peninsula, northeastern Ireland: evidence for the continuing existence of a major politico-religious boundary 253
Accuracy of recall by middle-aged participants in a longitudinal study of their body size and indices of maturation earlier in life 155
Age at menarche of European, Afro-Caribbean and Indo-Pakistani schoolgirls living in London 167
Age at menarche: deceleration of in Poland 507
Age changes in adult stature: trend estimation from mixed longitudinal data 433
Age, sex and socioeconomic correlates of fat patterning among adults from the Chandigarh zone of northwest India 463
Anthropometric-hormonal correlation patterns in San and Kavango males from Namibia 341
Aymara men, salivary testosterone concentration in 515

Basque: characterization of digital dermatoglyphic features in Salazar Valley: comparison with other Basque valleys 221
Burkina Faso, population genetics of abnormal haemoglobins in 295

Characterization of digital dermatoglyphic features in Salazar Valley: comparison with other Basque valleys 221
Chinese children aged 7 years, geographic clustering of body size 137
Comparative growth of Efe pygmies and African farmers from birth to age 5 years 113
Consanguinity, gestational age and anthropometric measurements at birth in Pakistan 535

Deceleration of age at menarche in Poland 507
Digital dermatoglyphics in Ireland, a study 485
Diurnal variation in standing height, further observations on 541
DNA double strand break damage and repair in lymphocytes, gender differences in age related decline 405
DOM breast cancer screening project and the 1945–45 'Dutch Famine': effect of wartime conditions on recalled menarcheal age 57
'Dutch Famine': 1944–45, effect of wartime conditions on recalled menarcheal age on 57
Dynamics of grwoth of width in distance, velocity and acceleration 449
Dynamics of linear growth in distance, velocity and acceleration 187

Early influences on the secular change in adult height between the parents and children of the 1958 birth cohort 127
Efe pygmies, comparative growth from birth to age 5 years 113
Effect of wartime conditions and the 1944–45 'Dutch Famine' on recalled menarcheal age in participatns of the DOM breast cancer screening project 57
Ethnic and environmental factors affecting fetal growth in Papua New Guinea 235
Evidence of weaning stress and catch-up growth in the long bones of a Central California Amerindian sample 9

Family resemblance in body circumferences and their ratios: the Nancy family study 259
Father's unemployment and height of primary school children in Britain 441
Ferrara, isonymy in records of births and deaths in 395
France, serum cholinesterase polymorphism in 1

Gender differences in age-related decline in DNA double-strand break damage and repair in lymphocytes 405
Genetic demography of the Moscow population: migration, outbreeding and assortative mating 31
Genetic influences and grip strength norms in the NHLBI twin study males aged 59–69 425
Geographic clustering of body size of Chinese children aged 7 years 137
Growth of school children of southern Iran in relation to the NCHS standard 527
Guatemalan children, measurement of growth variability and environmental quality in 285
Gurkha soldiers, basal metabolic rate and physique of, stationed in Britain 245

Height and height velocity in early, average and late maturers followed to the age of 25: a prospective longitudinal study of Swedish urban children from birth to adulthood 47
Height and weight of Tokyo schoolchildren with and without intellectual handicaps 327
Height, weight and menarcheal age of adolescent girls in Oman 71

India, northwest: age, sex and socioeconomic correlates of fat patterning among adults from the Chandigarh zone 463
Iran, southern: growth of school children of, in relation to NCHS standard 527
Ireland, digital dermatoglyphics in 485
Ireland, northeastern (Ards Peninsula), ABO and Rh(D) frequencies: evidence for the continuing existence of a major politico-religious boundary 253
Isonomy in records of births and deaths in Ferrara 395

Longitudinal analysis of incomplete adolescent data 311
Longitudinal study of osteoarthritis of the hand: the effect of age 417

Marital distance and child variability 121
Maturation earlier in life *see* Accuracy of recall 155
Measurement of growth variability and environmental quality in Guatemalan children 285
Menarcheal age for Norwegian women born 1830–1960 207
Monoamniotic twins: a further note on sex ratio 471
Month at menarche: a re-evaluation of the seasonal hypothesis 383
Moscow: genetic demography, migration, outbreeding and assortative mating 31
Multiple sclerosis, aetiology of, an ecological approach 95

Namibia: anthropometric-hormonal correlation patterns in San and Kavango males 341
Nancy family study: family resemblance in body circumferences and their ratios 259
North-west Indian children, tempo-unconditional 1-year bone score velocities in 303
Norwegian women, born 1830–1960, menarcheal age 207

Oman: height, weight and menarcheal age of adolescent girls in 71
Osteoarthritis of the hand: the effect of age, a further study 417

Pakistan: consanguinity, gestational age and anthropometric measurements at birth in 535
Papua New Guinea: ethnic and environmental factors affecting fetal growth in 235
Phenylketonuria, physical growth of children treated for 357
Physical growth of children treated for phenylketonuria 357
Population genetics of abnormal haemoglobins in Burkina Faso, West Africa 295

Salivary testosterone concentration of Aymara men native to 3600 m 515
Secular changes in height and weight of Stockholm schoolchildren born in 1933, 1943, 1953, and 1963.. 497
Serum cholinesterase polymorphism in France: an epidemiological survey of the deficient alleles detected by an automated micro-method 1
Sex ratio of monoamniotic twins: a further note 471
Skeletal maturity at onset of the adolescent growth spurt and at peak velocity for growth in height: a threshold effect? 23
Stockholm school children, secular changes in height and weight 497
Swedish urban children, height and height velocity in 47

Tempo-unconditional 1-year bone score velocities in well-off North-west Indian children 303
Testosterone, salivary concentration in Aymara men native to 3600 m 515
Tokyo school children, height and weight with and without intellectual handicaps 327

Weaning stress, evidence of in long bones of Central Californian Amerindian sample 9

ANNALS OF HUMAN BIOLOGY, 1991, VOL. 18, NO. 6, 559–562

INDEX OF AUTHORS

ALBERMAN, E., FILAKTI, H., WILLIAMS, S., and EVANS, S. J. W.: Early influences on the secular change in adult height between the parents and children of the 1958 birth cohort, 127
